SUPERVISORY PATENT EXAMINER

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I and Species IA (claims 1-7 and 23) in the reply filed on January 18, 2005 is acknowledged.

Claim 1 is generic and allowable. Since all pending claims depend from or otherwise include each of the limitations of claim 1, the restriction requirement is hereby withdrawn.

In view of the above noted withdrawal of the restriction requirement, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, either singularly or in combination, does not disclose or suggest the combination of limitations including an amorphous layer formed of boron phosphide-based semiconductor is disposed between the p-type upper cladding layer and the n-type light emitting layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,042,043 (Hatano et al.) – discloses a double hetero-junction semiconductor laser comprising boron-phosphide based semiconductor materials.

US 6,831,293 (Udagawa) – discloses a light emitting device comprising a n-type Group III nitride light emitting layer, a p-type boron-phosphide based upper cladding layer, and a crystalline p-type boron-phosphide based layer between the active layer and the upper cladding layer.

Art Unit: 2815

US 2004/0183089 (Udagawa) – discloses hetero-junction semiconductor LED comprising an amorphous, boron-phosphide based upper cladding layer. Note that this reference does not disclose an additional amorphous layer between the upper cladding layer and the light-emitting layer.
